

BLANKET TECHNOLOGY  
MADE IN GERMANY

**CONTI-AIR®**  
BLANKET TECHNOLOGY

**CONTI-AIR® STEEL SB**  
Coldset Printing Blanket

# CONTI-AIR® STEEL SB

## The Metalback Printing Blanket for UV Curing Inks

- › Designed for sheetfed applications
- › Medium hard blanket construction
- › Developed for highest durability
- › Using the special CONTIAIR® microcell technology

### Guiding Value

|   |                 | Standard                  |
|---|-----------------|---------------------------|
| <b>Application:</b>                               | Sheetfed/Webfed |                           |
| <b>Nominal Thickness:</b>                         | 1.63            | DIN EN ISO 2286-3*        |
| <b>True Rolling (Paper feed characteristics):</b> | neutral         |                           |
| <b>Color:</b>                                     | black           |                           |
| <b>Surface finish:</b>                            | ground          |                           |
| <b>Hardness of Surface Compound (shore A):</b>    | 65              | DIN ISO 48-4:2021-02**/** |
| <b>Metal base:</b>                                | Steel           |                           |
| <b>Backside:</b>                                  |                 |                           |

\* Performed in accordance with the given standard. Please note that the procedure of testing could be deviate and that the number of samples tested may differ.

\*\* The specified hardness of the cover compound can only be measured using test samples according to the standard. It is not possible to measure the hardness directly on the product itself.

Unsere Drucktücher verfügen über eine spezielle CONTI-AIR® kompressible Schicht geschlossener Mikrozellen mit Überdruck.

Our printing blankets have a special CONTI-AIR® compressible layer of over pressured microcells.
